

**Thomas Gabriel, KNIME.com AG**

### **Kurzprofil**

Thomas Gabriel: arguably the author of the one of the first lines of KNIME code. He has a degree in Computer Science, has gained valuable experience working in data analytics labs in San Francisco, and he holds a PhD in Fuzzy Logic and Rule Systems, from the University of Konstanz, Germany.

He is one of the co-founders of KNIME and is now COO at KNIME.com heading sales and operations.

### **Abstract**

At KNIME®, we build software for fast, easy and intuitive access to advanced data science, helping organizations drive innovation.

Our KNIME Analytics Platform is the leading open solution for data-driven innovation, designed for discovering the potential hidden in data, mining for fresh insights, or predicting new futures. Organizations can take their collaboration, productivity and performance to the next level with a robust range of commercial extensions to our open source platform.

For over a decade, a thriving community of data scientists in over 60 countries has been working with our platform on every kind of data: from numbers to images, molecules to humans, signals to complex networks, and simple statistics to big data analytics.

KNIME's headquarters are based in Zurich, with additional offices in Konstanz, Berlin, and Silicon Valley. We're open for innovation®, so visit us at [KNIME.com](https://www.knime.com).
